

THE FUTURE OF NUCLEAR IS SHAPED HERE

200+ Participants

20+ Speakers

10+ Exhibitors

binding.energy is the international strategy and community event for the fusion and fission sectors. Taking place February 3–5, 2026 in Aachen, Germany, the conference brings together key decision-makers from industry, policy, research and regulation – with a strong focus on Small Modular Reactors (SMRs), Generation IV systems, fusion technologies, and global collaboration.

What makes binding.energy unique?

- High-level speakers from the UK, Japan, US, Korea, Canada, China and the EU
- Strategic focus on market developments, licensing, commercialization and investment
- C-level networking in an open and purpose-driven environment
- Exhibitors with cutting-edge technologies and project potential

Why participate or partner?

- Direct access to exclusive insights and international decision-makers
- Clarity on technologies, roadmaps and regulatory landscapes
- New business opportunities, partnerships and European visibility
- Pitch slots and on-stage presence for sponsors & exhibitors

Voices of the participants

View Video

Aline Des Cloizeaux
Director, International Atomic Energy Agency

„My motivation to join was the possibility to speak about fission and fusion. Large nuclear power plants will remain popular, yet we see many StartUps also in SMRs and Fusion, of course.“

View Video

Giovanni Landi
General Manager, Alpha Ring

"This event has a particular interest in bringing together Fusion and Fission experts to share knowledge."

View Video

Dr. Wolfgang Walter
Manager, Bilfinger Nuclear & Energy Transition GmbH

"We are active in both, Fission and Fusion. There is an interesting business growing with a very big potential. It is really a worldwide endeavour."

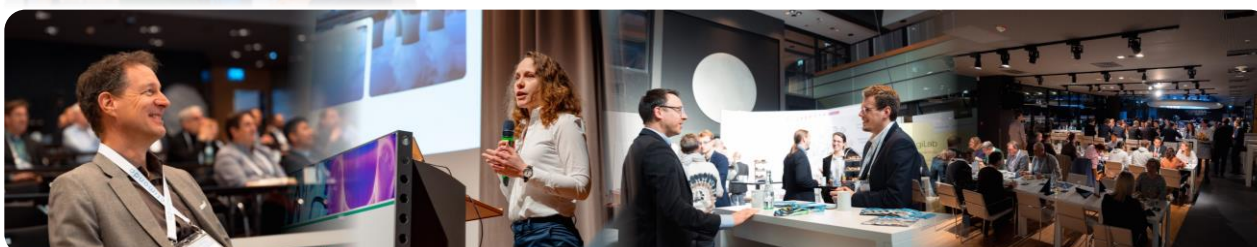

View Video

Dr. Alain Bécoulet, Deputy Director, ITER Organization

"While the hot core differs between Fission and Fusion as sources of nuclear energy, the development, constraints, cooling, safety and so on are essentially very similar. So there is much more than we might think to learn from each other."
